Taylor Machine Works, Inc. Announces the XH-650L and the XH-700L Lift Trucks

Taylor Machine Works, Inc. is pleased to announce the XH-650L and the XH-700L Lift Trucks. For over 90 years, the Taylor name has become synonymous with purpose-built machines specifically designed to meet the needs of our customers. “These two new models retain full rated capacity when equipped with side shift carriage and paired with standard spec forks. Combined with the new *all steel* Taylor DREAM cab, these two heavy capacity lift trucks offer uncompromised durability” said Hal Nowell, Director of Sales.

The XH-650L and XH-700L are powered by a 250-hp Cummins QSL9 Tier 4 Final turbocharged diesel engine. This robust power plant brings the low-end torque that Taylor customers require. These two new models feature a full range of structurally enhanced Ultra-View XD Mast to cover any lifting application found at our customer’s demanding industrial locations. The XH-650L and XH-700L are also equipped with a heavy-duty planetary axles, wet disc brakes, multi-speed automatic powershift transmissions, and the most durable steer axle in the industry.

Like all Taylor products, these trucks are backed by Sudden Service, Inc. and their specially trained personnel along with our dedicated team of Authorized Taylor Dealers and direct factory store locations across the United States and abroad. Our goal is to provide high-quality products and immediate assistance to our customers through sales, rentals, service and support.

The Taylor XH-650L and the XH-700L Lift Trucks are a strong addition to our robust line up of over 100-models of material handling equipment. Taylor Machine Works, Inc. continually adds more models and features so our equipment offerings will be more versatile, efficient, and able to tackle the demands and needs of our customers.

For more information about the XH-650L and the XH-700L or other Taylor products, visit www.taylorforklifts.com. You can depend on Big Red!
